Description

Capgemini Recruitment 2023

Data Analysts are responsible for gathering, interpreting, and analyzing data from a variety of sources to help organizations make better informed decisions.

Jobs Near Me

They develop reports, visualizations, and dashboards to help stakeholders make key decisions related to their organizations. Data Analysts are also responsible for developing and maintaining data models and databases, ensuring data accuracy and integrity, and devising methods to optimize data collection and analysis. Furthermore, they must be well-versed in predictive analytics and statistical methods, and should have a strong understanding of software development and data mining techniques.
